***Everything's Cool* Screening Event
At Lumina Theater on August 24th 2009 at 7pm
To Climate Rescue**

As Part of UNCW ECO's Efforts to Support a Green Jobs Force

Wilmington, NC – UNCW ECO will host a global warming screening event at Lumina Theater on August 24th 2009 to create additional pressure on President Obama to be a leader for science based climate change legislation.

Everything's Cool is a film about America finally "getting" global warming in the wake of the most dangerous chasm ever to emerge between scientific understanding and political action. While industry funded nay-sayers sing what just might be their swan song of pseudo-scientific deception, a group of global warming messengers are on a high stakes quest to find the iconic image, the magic language, the points of leverage that will finally create the political will to move the United States from its reliance on fossil fuels to the new clean energy economy - AND FAST. Hold on... this is bigger than changing your light bulbs.

It is important to fight for global warming solutions as a whole nation, with solutions that match the scale of the problem – we can bring large numbers of people out of poverty, while improving the environment and public health. UNCW ECO will screen the film, followed by a short Q&A about where climate legislation stands now and ways to take action. Refreshments will be served in the lobby following the Q&A and there will be postcards on hand that will be sent to President Obama himself.
